PROFESSIONAL SUMMARY

Results-driven Systems Analyst with 4+ years of experience delivering ERP, e-commerce, and POS solutions. Experienced in requirements gathering, business process analysis, SDLC, Agile methodologies, UAT coordination, stakeholder management, data migration, and documentation. Proven ability to bridge business and technical teams, support software implementations, and improve operational efficiency. Master of Science in Computer Science (Data Science).

CORE COMPETENCIES

Systems Analysis • Business Requirements Gathering • Process Mapping • Functional Specifications • SDLC • Agile/Scrum • User Acceptance Testing (UAT) • Defect Tracking • ERP Implementation • SQL • REST APIs • Python • Data Analysis • JIRA • Postman • Power BI • Tableau • Stakeholder Management • Documentation • Training

PROFESSIONAL EXPERIENCE

Systems Analyst | Invento Software Limited | Jan 2021 – Jul 2023

- Led ERP implementation and enhancement projects for organizations with 500+ employees across multiple industries.
- Gathered, analyzed, and documented business requirements, workflows, and functional specifications.
- Facilitated stakeholder meetings and translated business needs into actionable development requirements.
- Coordinated User Acceptance Testing (UAT), defect tracking, validation, and issue resolution.
- Managed data migration, data validation, post-go-live support, and user training activities.
- Created SOPs, user manuals, training guides, and business process documentation.

Junior Systems Analyst | Invento Software Limited | Jan 2019 – Dec 2020

- Supported implementation of 20+ e-commerce platforms and 40+ POS solutions.

- Assisted with requirements gathering, testing, issue tracking, and release validation.
- Worked closely with developers and QA teams to verify fixes and enhancements.
- Prepared user documentation and provided client support during implementation cycles.

PROJECT EXPERIENCE

Darzi – Tailor Management & Marketplace SaaS Platform

- Designed a SaaS platform connecting customers and tailoring businesses through marketplace functionality.
- Developed business requirements, user stories, workflows, and product roadmap.
- Defined data structures for customers, tailors, measurements, appointments, reviews, and orders.
- Planned mobile and web architecture using React Native and Firebase.
- Applied Agile planning techniques to prioritize features and future product releases.

Public Safety Risk Prediction System

- Developed machine learning models using Boston crime datasets to predict neighborhood risk levels.
- Performed data cleaning, exploratory analysis, feature engineering, and model evaluation.
- Built Random Forest, KNN, Logistic Regression, Decision Tree, and Naive Bayes models.
- Created a Streamlit dashboard to visualize predictions and support decision-making.

TECHNICAL SKILLS

Languages: SQL, Python, R

Business Analysis: Requirements Gathering, Process Mapping, UAT, SDLC, Agile

Tools: JIRA, Postman, Git, GitHub, Excel, Power BI, Tableau

Development: Firebase, React Native, Streamlit, REST APIs

Data: Pandas, Scikit-learn, Data Visualization

EDUCATION

Master of Science in Computer Science (Data Science) – Fitchburg State University, USA (2025)

Bachelor of Science in Computer Science – BRAC University, Bangladesh (2018)

WORK AUTHORIZATION

Authorized to work in the United States under F-1 OPT. No current sponsorship required.
